

HOW TO APPLY: Please email resume to jessica@princetechtechnology.com with “UX Interaction Designer” listed in email subject title.

Job Title: UX Interaction Designer

Job Duties: Design holistic in-vehicle experiences (hardware, software, services) for automotive global products. In collaboration with a multi-disciplinary team, apply human-centered design expertise throughout lifecycle; from user research insights to framing new opportunity spaces and defining experiences for future global customers and consumer centered strategies. Apply interaction design specialization to concept ideation, prototype, and test with users. Use Adobe Creative Suite, Sketch, Figma, Invision and Axure. Perform ethnography research, usability testing and design research. Perform interaction design including wireframing, design concept ideation, interactive prototypes, user flow creation and user interface visualization. Interaction design for digital/product for automotive industry and autonomous vehicles.

Work Location: Various unanticipated work locations throughout the United States; relocation may be required. Must be willing to relocate.

Minimum Requirements:

Education: Master – Design, Interaction Design, Human Computer Interaction or User Experience Design

Experience: Three (3) years
